

React Native

Expo

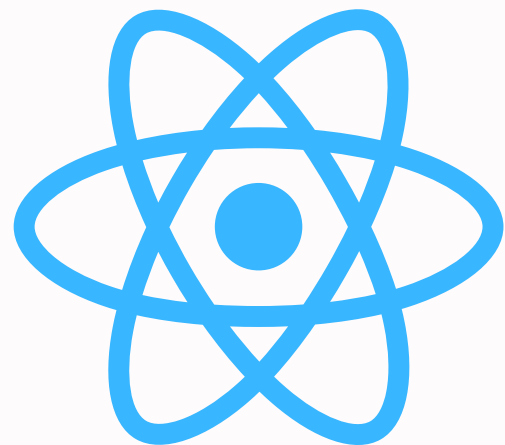

React Native Introduction

- Open-source framework by Meta for cross-platform development.
- Uses JavaScript & React to build apps for mobile, web, and desktop.
- Allows code reusability across multiple platforms.

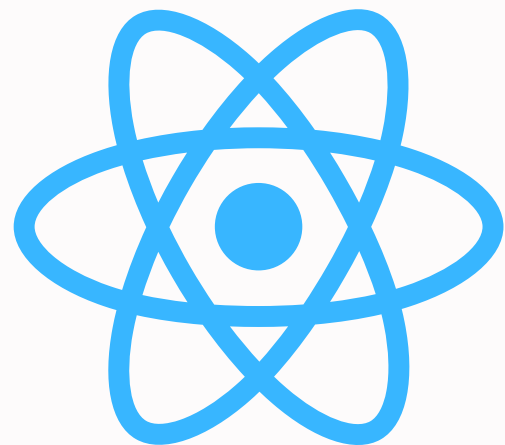

Two Ways to Create

- React Native CLI – Traditional method, requires manual setup.
- Expo – Managed workflow with built-in tools & simplified setup.

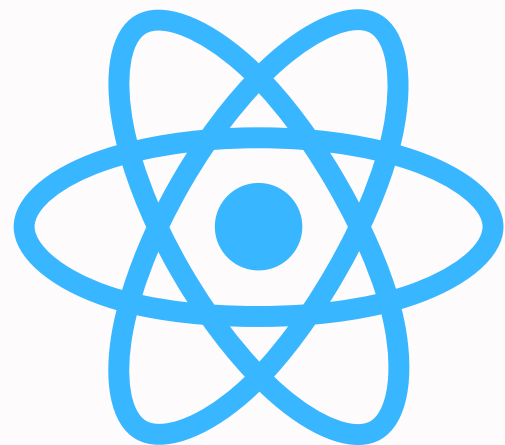

(Why Expo is Recommended?)

- Official Recommendation
- File-Based Routing
- Easy Setup
- Faster Development
- Over-the-Air Updates

In This Course

- Beginners to Advance
- Easy & Practical Examples
- Interview Questions Preparation
- Source Code
- Project

Expo CLI Setup
